Speaking of intestinal fortitude, legal researcher **Sherman Skolnick's** revelation that the **Guru Maharaj Ji** may in fact be not 15, but 30 years old should be of interest to horticulturists. Alleging that the Guru is just part of secret CIA-cum-press agent **Rennie Davis's** "bag of tricks," Sherman says the doctors determined the age discrepancy by examining the Guru's intestines. One of them was a tree surgeon who just counted the rings around his colon. On a serious note, Sherman summed up the Guru's and Rennie's gameplan: "It appears they are trying to take over the young spiritual movement."
